- (iii) Our feeling of suicide and disappointment it self disappear.

WAY OF LIFE

HOW TO CONSUME SWEET-SALTY, PUNGENT, HOT-COLD

Introduction:- Love and affection of nature in temperature, taste, air proved.

The answer to the above question must be known to Doctors, World Health Organization and nutrition experts. When they are asked, they answer that sweet-salty gives benefit as well as harm. According to them, there is no definite law as to when these items may become beneficial and when they might become harmful. The answer to this question is not possible because nature has created incompleteness. So as to get the solution of this problem, fifty years and millions were spent and discovery was made.

Taste-balance principal in food

- 1- Sugar + Salt + Sour mix Jam taste & eat them hot (static electricity 33%).
- 2- Eat salty dishes cold (Don't eat hot salty products) (positive electricity 33%)
- 3- Sweet delicacies should be taken hot (don't eat cold sweet products) (negative electricity 33%)

Note-All the three when taken give energy, as when the three phases of electricity when completed gives light. Nature's energy will not be felt if we take any two of the above three.

Precaution : Training is compulsory for everyone.

PRESENTING FOLLOWING FIVE PARTS IN THIS VOLUME.

Part-1	A fixed law of great nature for footed & undisputed Supreme Element.
Part-2	Peace Chariot
Part-3	Holistic Naturopathy
Part-4	Temperature Balance.
Part-5	Papers submitted in the 23rd World Congress of Philosophy

PREFACE

As a student of G.S. College of Commerce, Jabalpur in 1960, I read the following lines of Dr. Sarvapalli Radhakrishnan's speech in a local news paper–

“There is no such education in the world which may fill men with humanity.”

We are facing this problem perpetually. But we must be aware of the fact that Nature has concealed a secret in neutrality lying between humanity and evil. We would find ourselves nearer the nature the day we acquire practical knowledge regarding this secret and would be able to go further to find the solution of the said problem. Inspired by these expressions, I had made a resolution to solve this major problem.

By making deep and minute study of the activities of nature, it became known that nature is infused with love and affection in the same manner in which the mother of a child is filled with love and affection. A mother never lets her baby suffer. She herself sleeps in the wet but keeps her child in the dry. Similarly, fascinated by the love and affection, nature has made available three qualities with complete energy comprising of inanimate – animate – neutral which are made up of Electron + Proton + Neutron. This has now been discovered. This energy comprising of the three qualities has found practical usage in Physical – Mental – Neutral areas of our daily life.

Question : How would complete energy be possible in self?

Answer : Complete energy in self is proved as follows :-

I am good 33.333% + I am evil (bad) 33.333% + I am neutral 33.333% + Nature 0.001. Thus I/myself am a complete mass with 100% complete energy. Similarly, in electricity, complete electrical energy is obtained with the sum of negative electricity + positive electricity + static electricity.

Question: What is the remaining .001? The answer to this is available in the coming pages.

My inspirations :

1. Dr. Sarvepalli Radhakrishnan.
2. Dr. J.P. Shukla,(Lt.), Vice Chancellor,Rani Durgavati University.
3. Respected Sachhidanand ji Awasthi (Lt.), Justice, M.P. High Court.
4. Hon'ble Dr. Shri Prakash Dubey, Chairman, All India Philosophy Association, Retired Prof. Philosophy, Rani Durgavati University.
5. Respected Lt. Kake Shri Jamnadas Chandak.
6. Lt. Pt. Kamta Tiwari 'Raj' Editor, Yuva Sankalp.
7. Acharya Ram Kishore Tiwari
8. Res. Shri Subhash Chand Jain
9. Res. Shri Kaushal Kumar Agrawal
10. Late Shri Shiv Prasad Agrawal
11. Shri Surendra Sharma
12. Smt. Sandhya Pandey
- 13.

Lastly, I request all my learned readers to send their valuable suggestions and support, for which I shall be grateful.
